Work Experience

A Java Home | Java Developer Intern   **Jan'24 - Present**

● Responsible as a Java developer.
● I am collaborating with a team on a Java full-stack development project.

Projects

Student Data Management System

Full stack development project

● Two User roles for students and admins with login credentials.
● Stores and manages student and admin information in a PostgreSQL database.
● PostgreSQL database ensures data security with robust encryption and access control features.
● The development time is accelerated 2 times when Java Swing is used.

Email GUI Application

Full Stack Project

● Developed a front-end responsive user interface using Java and Angular 17.
● Enabled users to send emails through an intuitive and user-friendly interface.
● Created interactive web application for seamless communication.
● Using Angular material allowed for a 25% reduction in software development time.

Chat Application

Full Stack Project

● Using two technologies (Node.js and Socket.io), I led the entire development process of a chat application.
● Used HTML, CSS, and JavaScript to create a responsive frontend that improved the user experience.
● Established real-time broadcasts for user-to-user communication, on which more than 2 users can chat seamlessly.
● The application was optimized 3x while maintaining efficiency, and responsiveness to changing loads.
